PSAP Client – chat translation

The screenshot displays the PSAP Client interface. On the left, a patient profile is visible with fields for First name, Last name, Middle name, Gender, Date of birth, In case of emergency, Mobile App, and Event ID. The profile is partially obscured by grey boxes labeled 10.2.e. The 'Language' field is highlighted with a red box and contains the value 'en'. On the right, a chat window titled 'Caller: Dutch' and 'Operator: English' shows a real-time conversation. The chat messages are highlighted with blue boxes, indicating they are data chat. The messages include: 'Ook hallo, wat is uw noodgeval?', 'Ik heb een auto ongeluk gehad' (I have a car accident), 'Dat is niet zo mooi, bevindt u zich op de av d'ienna in waterloo ten hoogte van het fietspad?', 'Inderdaad' (Indeed), 'Wist u dat ik ook chinees spreek ;)' (Do you know I also speak Chinese?), 'Wist u dat ik ook 中国 spreek)', and 'This is a test in arabic' (هذا اختبار في اللغة العربية). The chat window also shows a 'Chat protocol: Real time text' section with a 'Use translation' checkbox checked and a dropdown menu set to 'Arabic'. An 'Export text' button is visible at the bottom of the chat window. A blue arrow points from the 'Language' field to the chat window. A text box on the right explains that blue highlights mean data chat and that the chat is in real time (RTT) so character per character is being sent.
